Week Report 3

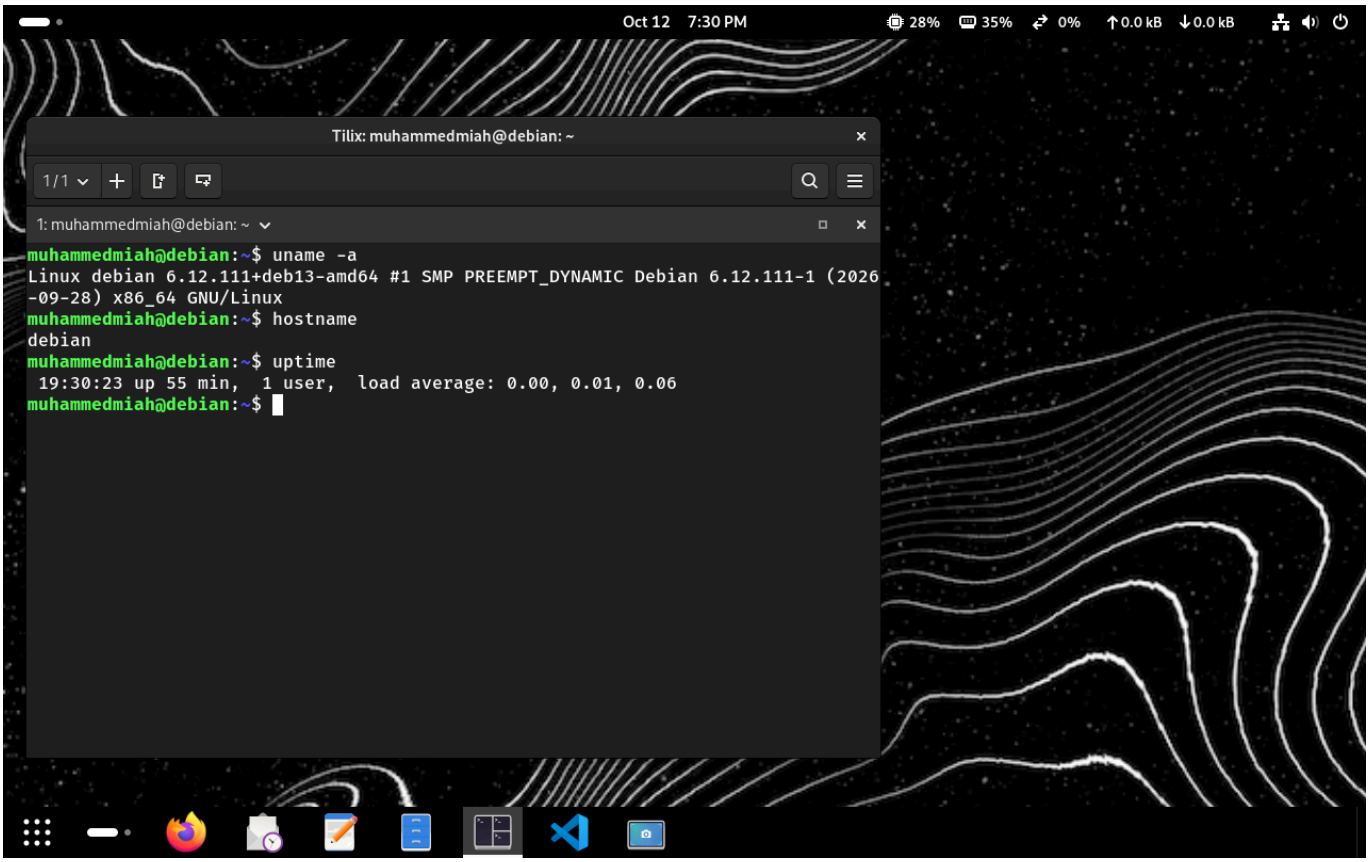

- **Course:** CIS 106
- **Semester:** Fall 2026
- **Lab Notes:** Notes 3

Lab Deliverables

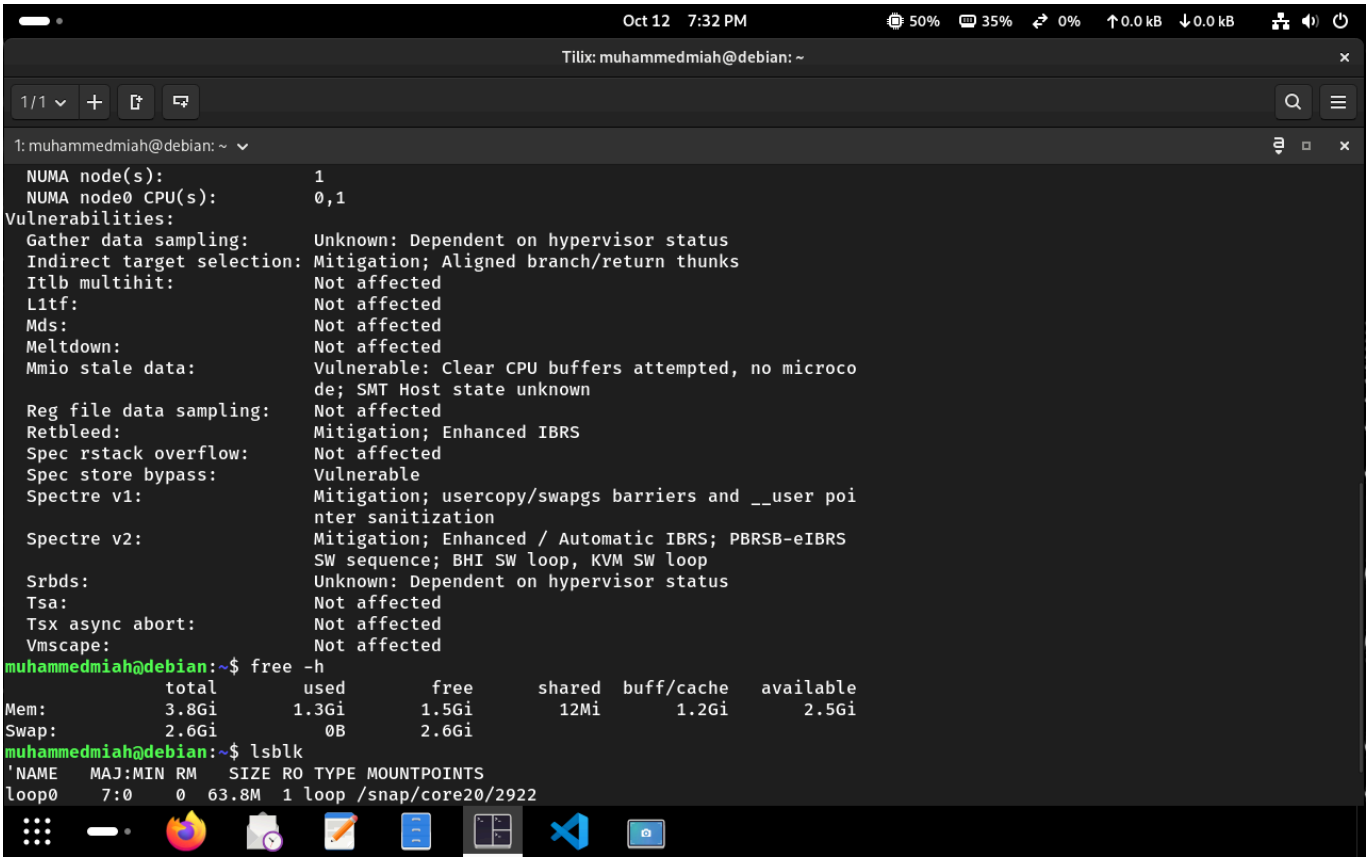

Practice 3: Navigating the GNOME GUI

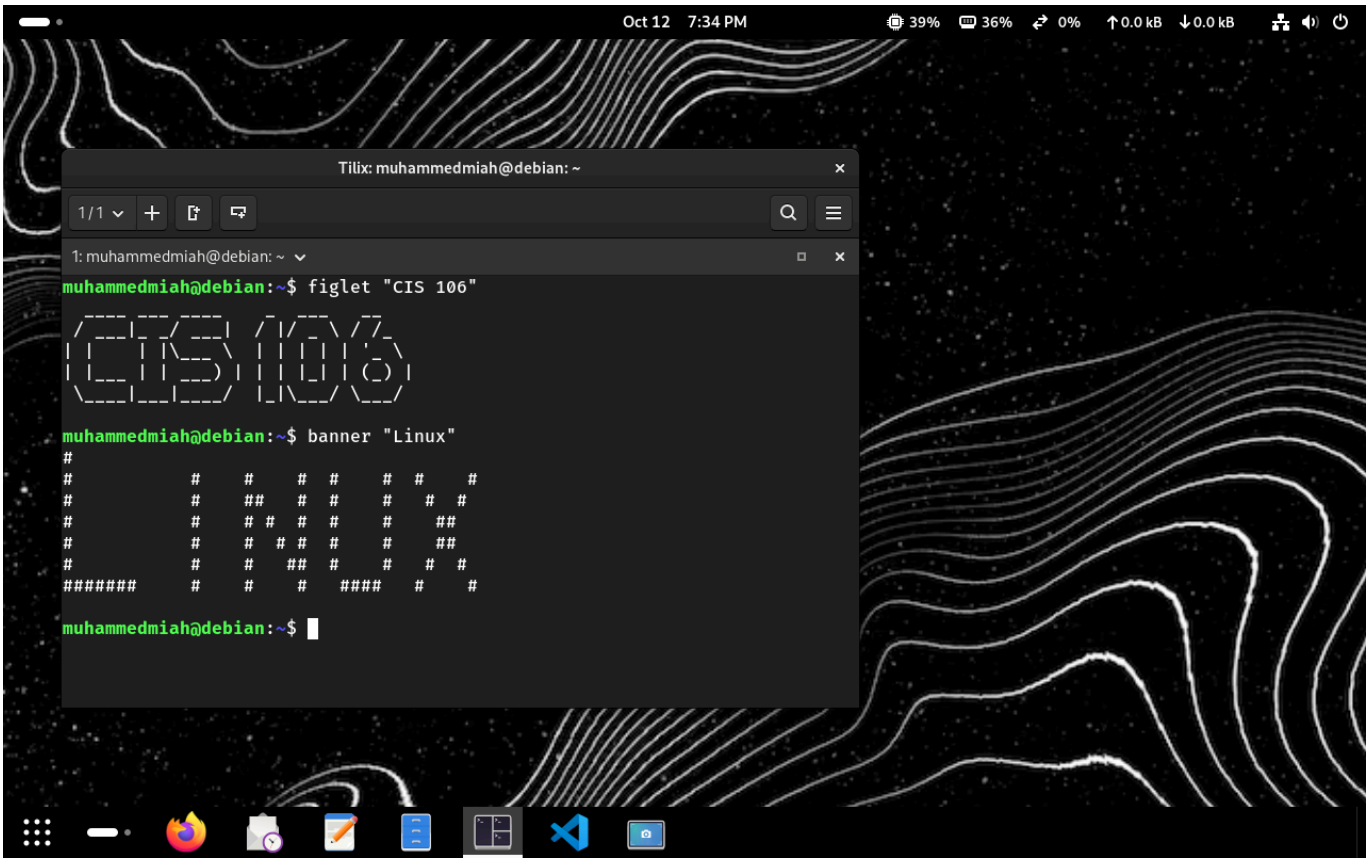

Practice 4: Terminal Customization & Navigation

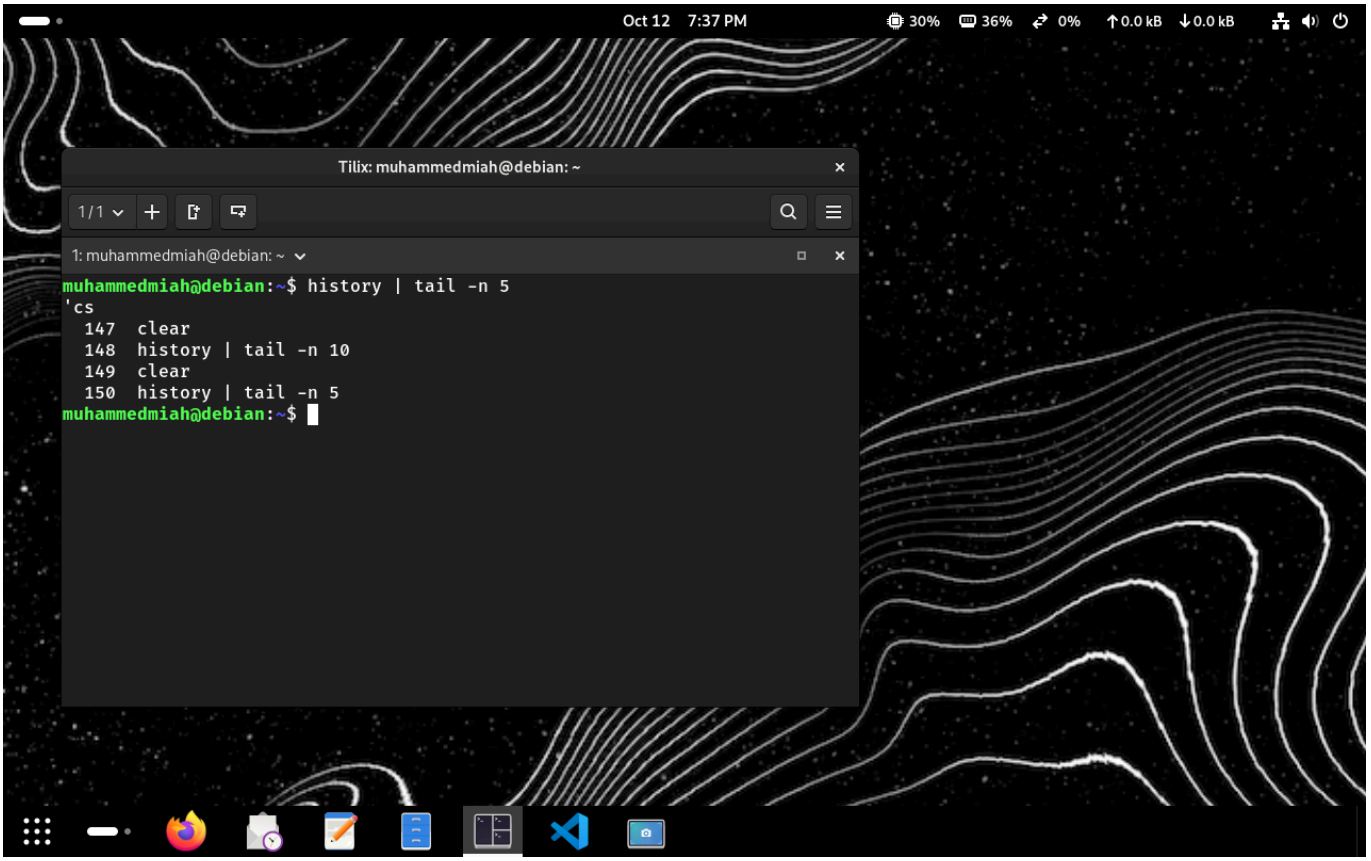

Practice 5: System Information Commands

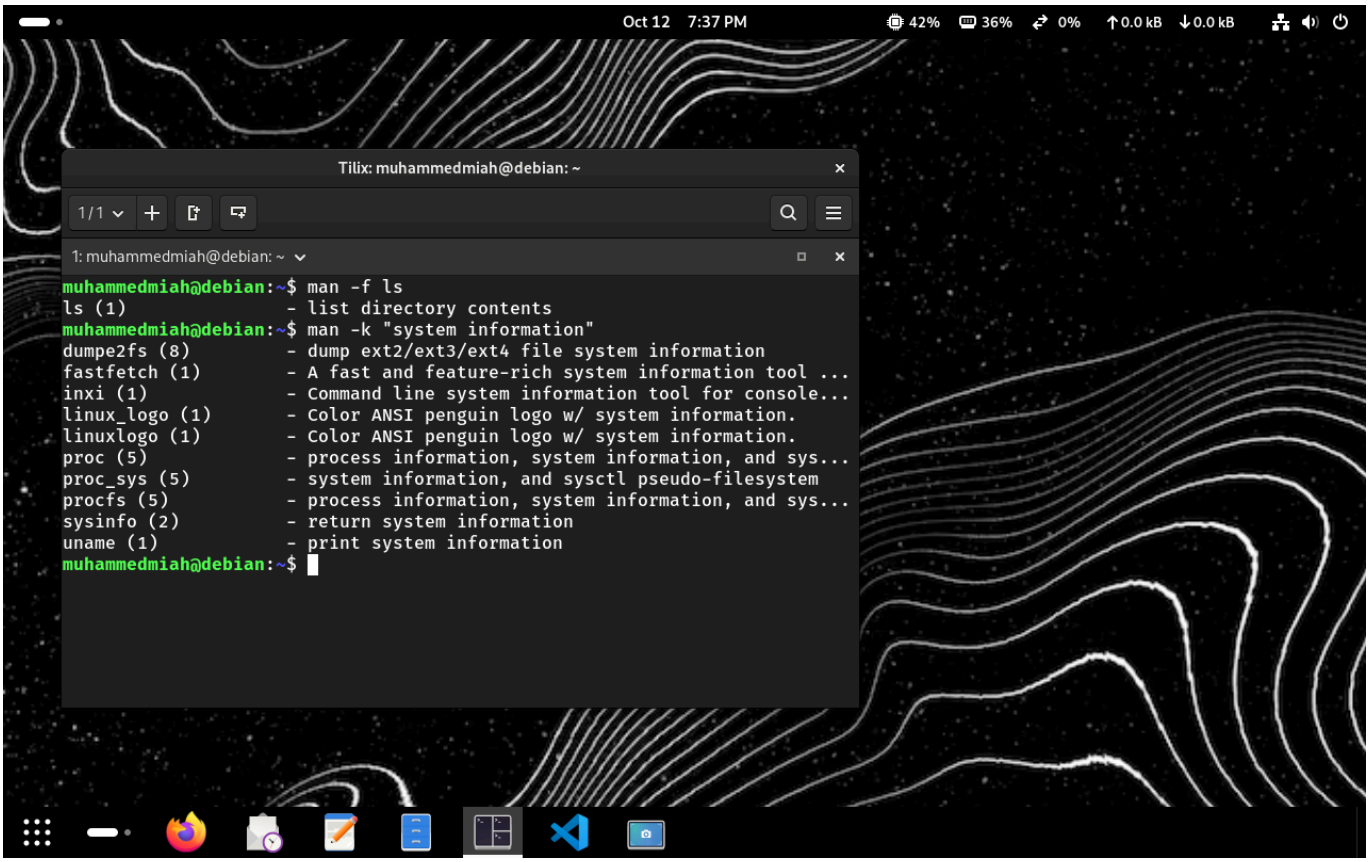

Practice 6: System Resource Commands

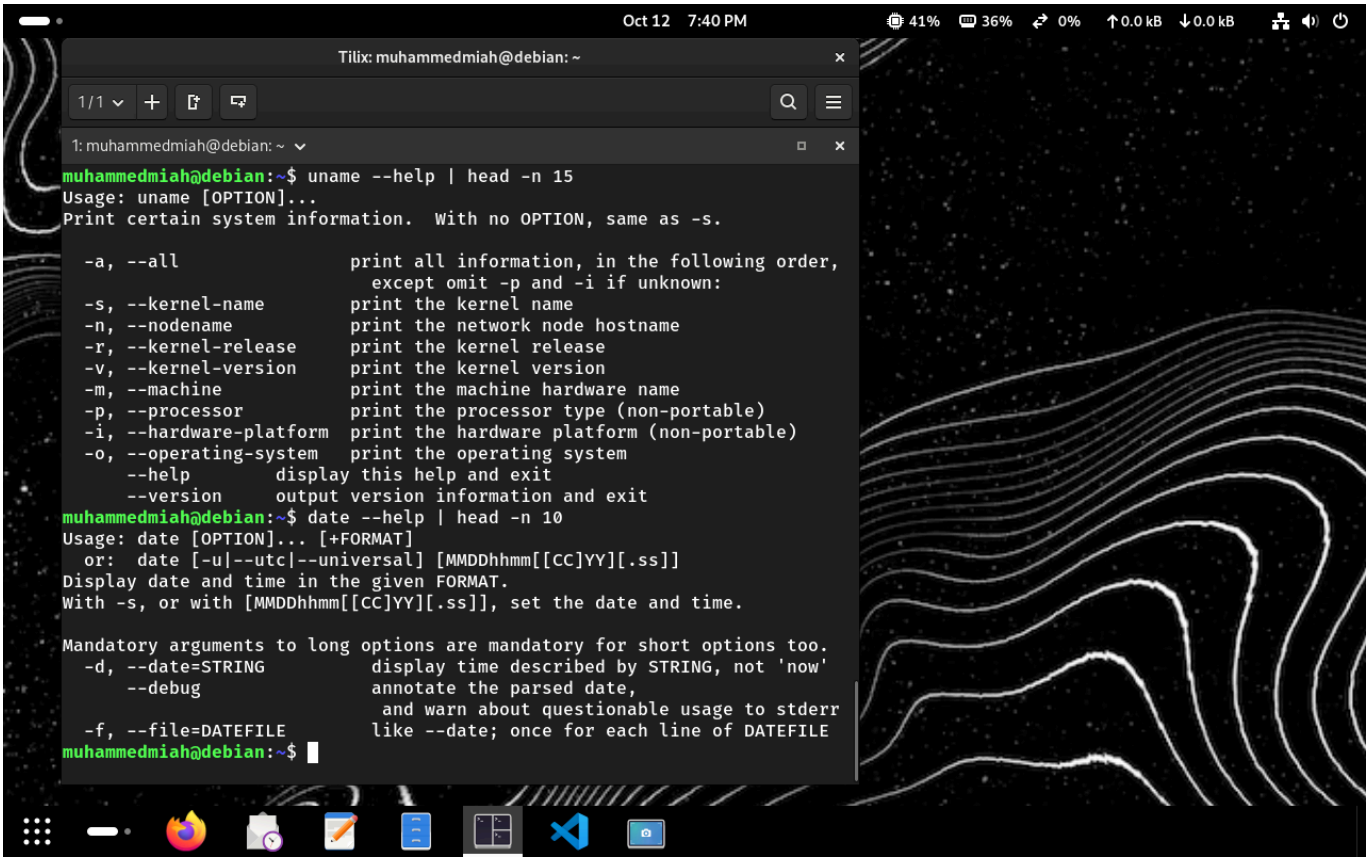

Practice 7: Command History

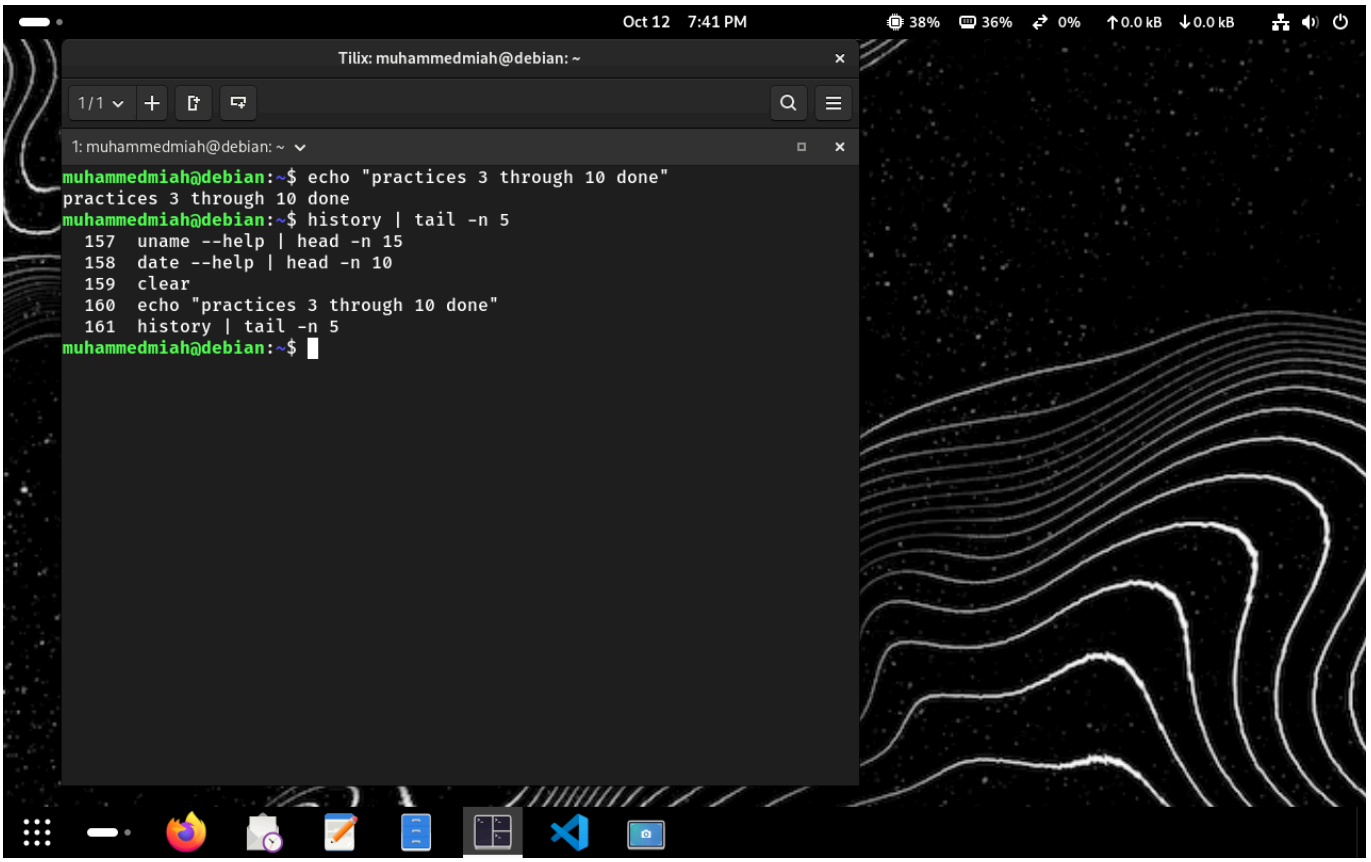

Practice 8: Using man Pages

Practice 9: Using --help

Practice 10: Final Review & Summary

Conclusion

In this lab, I learned how to navigate the GNOME desktop environment and use essential Linux command-line tools. I practiced checking system info with commands like `uname`, `free`, and `df`, as well as using command history, `man` pages, and `--help` flags to quickly learn how commands work.
